

# Asbestos Awareness Training Workshop

## 1 Who Should Attend . . .

This seminar is a must for anyone concerned about health and safety on the job including:

- ▶ Managers concerned about liability and worker's compensation costs
- ▶ Employees who want to learn proper techniques for protecting their safety and health at work
- ▶ Business owners who want to learn about compliance with MIOSHA

## 2 Why you need this Workshop . . .

- ▶ To reduce disabling injuries and illnesses to employees - and to ensure that every worker goes home safe and healthy every day.
- ▶ To reduce the high direct costs of work-related injuries, which grew to \$42.5 billion nationally in 2000, and indirect costs, which were estimated at an additional \$127 - \$212 billion in 2002. (*2003 Liberty Mutual Safety Index.*)
- ▶ To enhance your company's bottom line. A strong safety and health commitment not only protects workers, it also reduces worker's compensation costs, improves employee morale, and increases production and quality.

## 3 What You'll Learn . . .

Construction trades routinely renovate and demolish buildings that were built prior to 1981. These construction activities often result in contact with asbestos-containing materials. Asbestos Awareness Training is required annually for employees whose work activities may contact asbestos-containing materials (ACM) or presumed asbestos-containing materials (PACM), but do not disturb ACM or PACM during their work activities. This training consists of information regarding asbestos and its various uses and forms. Training also includes information on the health effects associated with asbestos exposure.

## Agenda

- |  |   |
|--|---|
| ▶ Asbestos: Its Various Forms & Uses   | ▶ Person Who Will Carry Out General Responsibilities & Location of the Management Plan or Operations & Maintenance (O & M) Plan |
| ▶ Health Effects Associated with Asbestos Exposure   |   |
| ▶ Recognition & Locations of Asbestos Containing Building Materials                          | ▶ State & Federal Regulations   |
| ▶ Recognition of Damaged, Deteriorated or Delaminated Asbestos Containing Building Materials |   |

# Facilitator

Sherry Scott has spent her entire State of Michigan career of fourteen years as an Industrial Hygienist with MIOSHA. Before her assignment to the Consultation Education and Training Division, Sherry served in a compliance capacity for the Occupational Health Division in both the Asbestos Program and Lansing District 6. In these assignments, Sherry conducted investigations of alleged occupational health hazards in the state program in industrial facilities and at construction sites in both the public and private sectors.

Assigned to Consultation Education and Training in 2000, Sherry's past work experience provide her with a practical simplicity in her current role as an industrial hygiene consultant. Her goals include the prevention of occupational disease and improving work environments in Michigan through education and training; along with the promotion of programs to achieve voluntary compliance with occupational health regulations.

Sherry earned an undergraduate degree in Industrial and Environmental Health Management from Ferris State University.
